

Reset lost Joomla admin password

Posted by joomtitorial - 02 May 2009 20:12

Hi,

This can happen, you lost or forgot your Joomla admin password and can't find a way to get into your Joomla website.

We created an easy form for you to reset your admin password. There is one thing you will need to have access to: You will need to be able to use PHPmyAdmin.

[Click here to use the reset password form](#)

Now you generated an encrypted password that we now need to put in your Joomla site. As mentioned, you will need to have access to PHPMyAdmin. Through your CPanel or the method your provider allows go to PHPMyAdmin.

The picture below will show you what to do with the generated code. Click on the picture to enlarge.
