

Changing the text ("Register") on the Community Builder form

Posted by rob - 21 Apr 2010 22:46

I need to change the button that reads "Register" to read "Submit" at... <http://greenpolishing.com/component/comprofiler/registers>

How do I accomplish that?

Or how to I stretch the button image a bit to accommodate "Register"?

Hi Rob,

That would be possible to change in the CB language file:

/components/com_comprofiler/plugin/language/default_language/default_language.php
